## CHRISTIAN SCIENCE

"Sacrament" was the subject of the Lesson-Sermon Sunday, July 8 in all Churches of Christ, Scientist, branches of The Mother Church, The First Church of Christ Scientist, in Boston, Mass.  
The citations which comprised the Lesson-Sermon included the following from the Bible: "They went forth, and entered into a ship immediately; and that night they caught nothing. But when the morning was now come, Jesus stood on the shore: but the disciples knew not that it was Jesus. And he said unto them, Cast the net on the right side of the ship, and ye shall find. They cast therefore, and now they were not able to draw it for the multitude of fishes. . . . Jesus saith unto them, Come and dine. . . . This is now the third time that Jesus shewed himself to his disciples, after that he was risen from the dead." (John 21).  
The Lesson-Sermon also included the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "This spiritual meeting with our Lord in the dawn of a new light is the morning meal which Christian Scientists commemorate. They bow before Christ, Truth, to receive more of his reappearing and silently to commune with the divine Principle, Love. They celebrate their Lord's victory over death, his probation in the flesh after death, his exaltation, and his final ascension above matter, or the flesh, when he rose out of material sight" (page 35).

## The Voice Of the People

The Torrance Herald, Torrance, California.  
Dear Sir:  
Board of Directors of Christian Science Society of Torrance wish to express their sincere appreciation to the Herald in giving space to their church notices and the portions of the lesson sermon each week.  
Mr. Lombard, Christian Science committee on publication for Southern California also expressed his thanks in a letter to Mr. Hannan, assistant committee on publication, July 3. It is gratifying that these reports are appearing in The Torrance Herald.  
Sincerely yours,  
Clerk, EDNA FLINT STONE.

**THREE HOUR FIGHT**  
A grass fire on the Marble Fee lease south of El Camino Real Friday afternoon kept the Torrance Fire Department busy for three hours.  
The boys showed a great deal of skill keeping the fire away from the wells and sump holes.

## Can the Farmer afford to ELECTRIFY?

Can the California farmer afford to electrify his farm? This question has been asked many men who are well informed of farming conditions and the answer has always been . . . where electric service is available to the farmer at a reasonable cost per kilowatt-hour he cannot afford to get along without it.

It has been found in California that electricity when available is used almost to the exclusion of all other power sources in pumping water for irrigation, drainage and domestic purposes. Why has it so completely replaced competitive power sources? Because it has been found to be as cheap or cheaper than they are and because it is considered more dependable and more convenient.

Mr. T. A. Wood, writing in "Electricity on the Farm" states, "I have yet to meet a farmer who, when his farm is once electrified, has anything but praise for electricity and its wonderful powers. When once installed, it never comes out. It is the one fixture on the farm."

If you have any job on your farm which you are interested in having done by electricity, a call or letter to any of our thirty-two district offices will be all that is necessary to bring an Edison representative to you. You will find him competent and ready to help you.
